

Prophetic Word from John Belesky (re Clive Palmer and the Federal Elections 2025)

An earthquake is about to hit the political scene in Australia.

I will use Clive Palmer to be as a sledgehammer.

The people of Australia want better. They are tired of being sold out by political parties.

People want peace and stability for our nation .

There will be a backlash against Greens, Labour and Muslim political party.

Churches need to hold political forums so the people can be fully informed on who they are voting for.
